

Mortgage+Care

I can't print charts

Are you currently unable to print or see the charts on our reports?

Here is how you can fix this:

You will need to run a small utility that will install the MICR font for your checks and also install some dlls on your windows folder in order for your charts to appear.

Steps

1. Download and install [Mortgage+Care Client Setup](#)
2. Follow the prompt and install the utility.
3. If you get an error message upon the completion of the installation, you can ignore the message.
4. Open Mortgage+Care again and run the reports.
5. You should now be able to print the charts.

If you need any assistance with this process, feel free to [contact us](#).
