

Mortgage+Care

Creating Mortgage+Care Shortcuts on your Local Computer or Server

1. After installing Mortgage+Care, go to the Mortgage+Care directory.

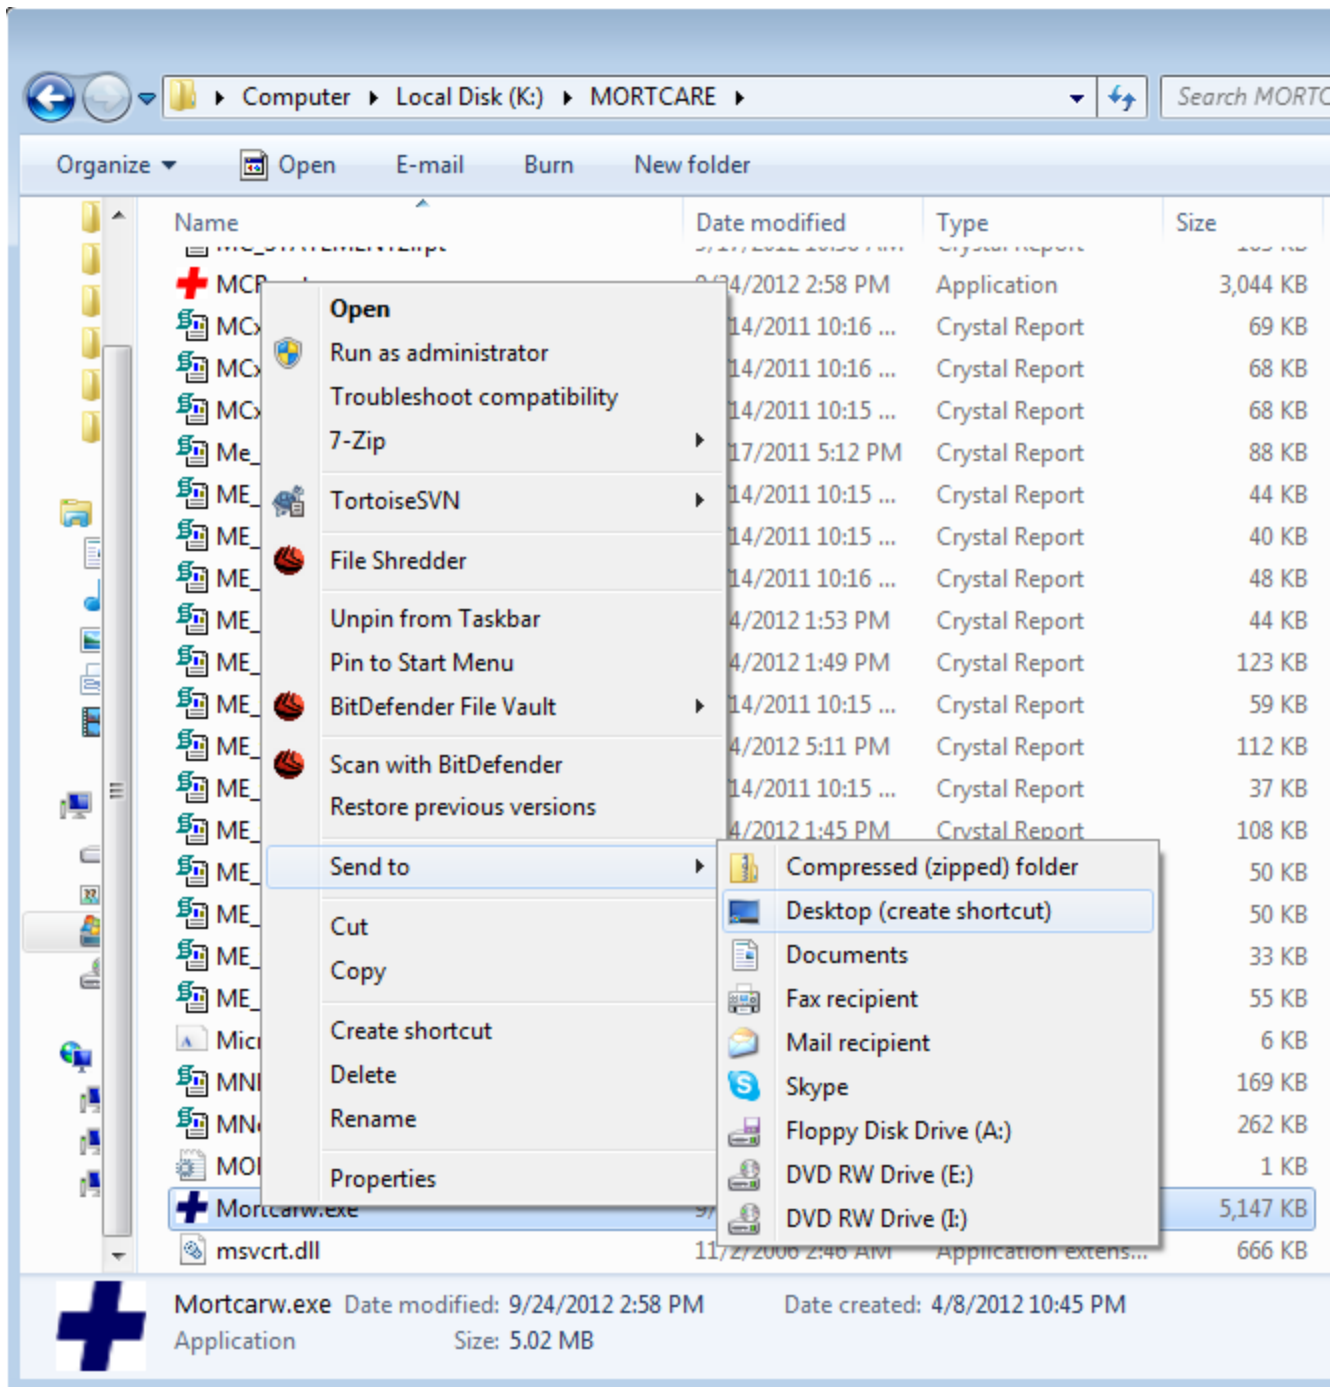

This can be found by launching **Mortgage+Care** and locating the directory on the **bottom status bar**.

2. Go to the designated directory and open the **MORTCARE** folder.

3. Here you will see a collection of files which includes **2** important ones, **MCRreset.exe** and **Mortcarw.exe**.

4. First select the **Mortcarw.exe** file and right click on the file. Now select the **Send to** option, then select **Desktop(create shortcut)**.

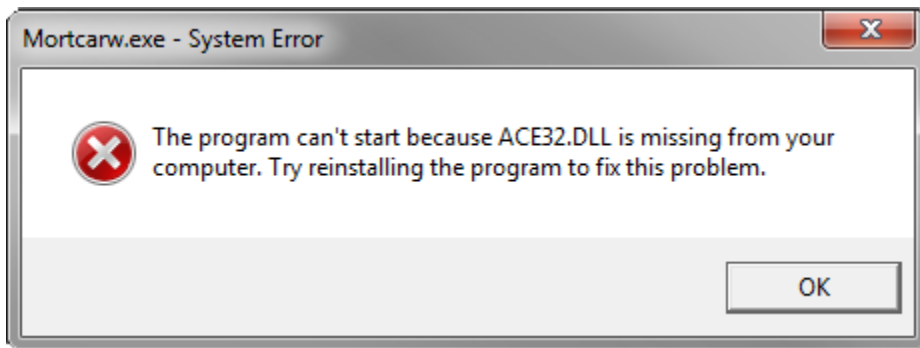

5. Follow step 4 to create an **MCRreset.exe** shortcut as well. This works on the different types of installations, locally or on a server.

Keep in mind that you must create a shortcut pointing to the **.exe** file.

If you simply copy the **Mortcarw.exe** or the **MCRreset.exe** and try to run the program.

You will receive the following error message:
