

Mortgage+Care

MICR Font not showing on checks

On your checks, do you see weird signs instead of your routing, account, and check number?

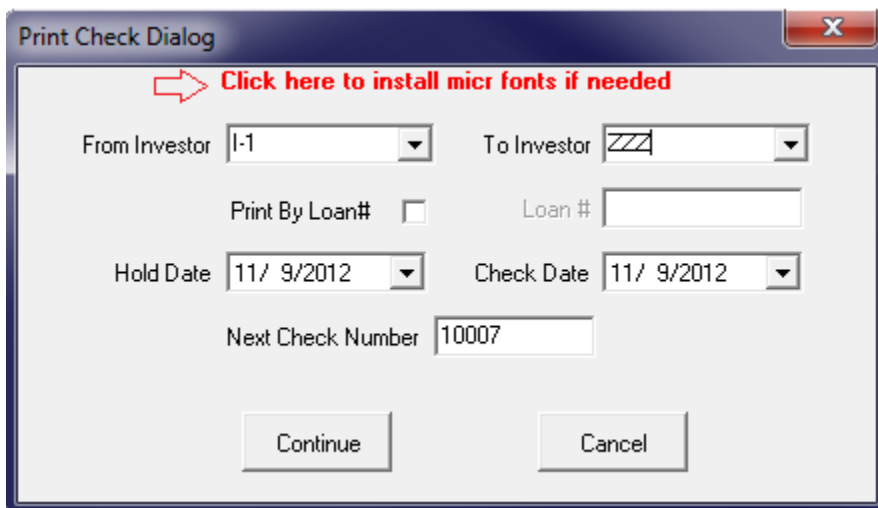

There are two ways of fixing this issue.

Option 1:

1. Download and install a small utility that will take care of this for you.
2. Download it here [Mortgage+Care utility](#)

You can also download this utility straight from Mortgage+Care! Simply click on the red text while in Mortgage+Care.

7. Log back into Mortcare and make sure the fonts have changed.

Option 2:

Your Goal: There is a MICR12.TTF file in the Mortcare directory, copy this file from the Mortcare folder and paste it in your Windows fonts folder.

1. Start from the **COMPUTER** directory
2. Go to the drive that Mortcare was installed and double click on the **Mortcare** folder
3. Locate the **MICR12.TTF** file and right click on it and select **Copy**
4. Click on the **BACK** button on the top of the screen until you get back to the main **COMPUTER** directory
5. Go to your **Local Drive (C:)** and double click on the **WINDOWS** folder
6. Locate the **FONTS** folder and right click on it and select **Paste**.
7. Log back into Mortcare and make sure the fonts have changed.
